

SnapLogic Intelligent Integration Platform

A unified platform to connect data, apps, APIs, and partners

The SnapLogic Intelligent Integration Platform (IIP) accelerates data and process flow across cloud and on-premises applications, as well as data warehouses, big data streams, and IoT deployments. Unlike traditional integration software requiring painstaking, handcrafted coding by teams of developers, SnapLogic makes it fast and easy to create scalable pipelines and workflows that supply the right data to the right people at the right time. Functionally, SnapLogic’s data streaming architecture permits real-time processing with high throughput, powering the rapid movement of data across the enterprise. Lastly, SnapLogic’s machine learning-powered Integration Assistant, provides expert guidance to swiftly build high-quality pipelines/workflows.

Intelligent Integration Platform architecture

The SnapLogic Intelligent Integration Platform is purpose-built for next-generation application, API, and data integration requirements. The Intelligent Integration Platform manages orchestrations, schedules, connections, and security details through the Designer, Manager, and monitoring Dashboard. A Snaplex, a self-upgrading execution network that scales elastically based on data processing volumes, streams data between applications and data sources.

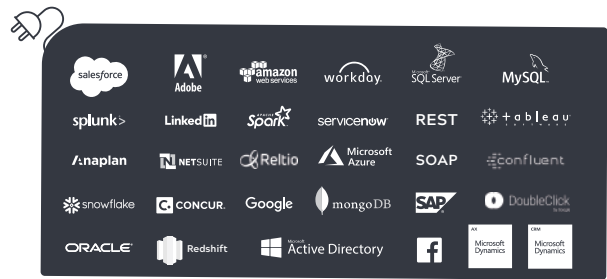

Platform: Self-Service UX

Cloud-based Designer to build integration pipelines; Manager to administer users and track technology resources; and Dashboard to monitor overall health and performance.

Pre-Built Connectors: Snaps

500+ Snaps connect most commonly used ERPs, CRMs, SaaS, APIs, partners, data, big data, and IoT, plus an SDK to build your own custom Snaps.

Execution Grid: Snaplex

Provides elastic scalability; respects data gravity; supports data security; and facilitates real-time streaming speeds.

“We look at SnapLogic as an opportunity to think differently about integration.”

► **Jim Teal, Information Architect, iRobot**

SnapLogic provides the #1 intelligent integration platform. The company’s AI-powered workflows and self-service integration capabilities make it fast and easy for organizations to manage all their application integration, data integration, and data engineering projects on a single, scalable platform. Hundreds of Global 2000 customers – including Adobe, AstraZeneca, Box, GameStop, Verizon, and Wendy’s – rely on SnapLogic to automate business processes, accelerate analytics, and drive digital transformation.
