

7 Questions to ask from your Data Loader

Endpoints

- Can it load data into your favorite data warehouse, be it Snowflake, Redshift?
- How quickly can you load the entire source database (500 GB - 5 TB) into your cloud data warehouse?

Affordable and predictable pricing

- Does your data loader give you predictable pricing? Do they charge you based on the amount of data being moved to the cloud data warehouse?

Data and schema

- Can it effectively handle changes to the source schema?
- Does your data loader provide built-in support for capturing historical data (SCD2)?
- Does the data loader respect the variety of data types (date, numeric, currency, etc.)?
- Do you need to know coding or even SQL to load data into the data warehouse?

SnapLogic powers the automated enterprise. The company's self-service, AI-powered integration platform helps organizations connect applications and data sources, automate common workflows and business processes, and deliver exceptional experiences for customers, partners, and employees. Thousands of enterprises around the world rely on the SnapLogic platform to integrate, automate, and transform their business. Learn more at snaplogic.com.
